# *Fragrance* TIPS & TRICKS

## **Apply to “Power (Pulse) Points”**

*Where warmth meets wow, make your scent work smarter.*

Spritz your fragrance where your skin is warmest, like your wrists, neck, inside elbows, and behind your knees. These spots help diffuse the scent naturally all day.

## **Don’t Rub! Spritz, Don’t Smash**

*Rubbed wrists ruin the vibe, let it settle, like fine wine.*

After spraying, let it settle into your skin. Rubbing your wrists together can crush the top notes and change the scent.

## **Fragrance Before Fashion**

*Spray before dressing, your clothes will thank you.*

Apply before you get dressed. This keeps your clothes from being stained and helps the scent melt into your skin for a longer-lasting effect.

## **Moisturize First - Moisture equals “Magic”**

*Dry skin’s a scent thief. Lotion up first!*

Dry skin doesn’t hold scent well! Apply fragrance over an unscented lotion or oil to help it cling and last longer.

## **Less is More - Less Is Luxe**

*You’re unforgettable, not overpowering.*

You want to invite curiosity - not overwhelm. A couple of spritzes is usually plenty. You’re not trying to announce yourself, just leave a little magic behind.

## **Layer It Up - Layer Like a Pro**

*Body wash, lotion, fragrance, your scent story, start to finish.*

Use matching body lotion, shower gel, or oil to build your scent and make it last. JAFRA has beautiful layering options!

## **Match Your Mood - Wear Your Mood**

*Fragrance is feeling. Dress your soul.*

Fragrance is emotional - it can calm, energize, or enchant. Let your scent reflect how you feel (or how you want to feel). That’s what your Mood Vibe is all about.

## **Try Fragrance Wardrobing - Create a Scent Wardrobe**

*Why have one when you can have a whole closet of vibes?*

Just like your clothes, different fragrances suit different occasions. Keep a few on hand for work, play, self-care days, and those special sparkle moments.

## **Store It Right - Hide It From the Heat**

*Keep your perfume cool, dark, and mysterious, just like you*

Keep your bottles in a cool, dark place, not the bathroom or a sunny windowsill. Heat and light can break down the scent.

## **Make It Personal - Test It on You, Avoid Paper**

*Your skin is the stage. Let the chemistry shine.*

Your skin chemistry is unique! A fragrance might smell one way on a paper strip and completely different on you. So, try it on and give it a little time.
